# Power BI Project Report - HR Dashboard

**Project Objective:**

This Power BI project involves the creation of an HR (Human Resources) dashboard that provides an overview of a company's employees. The dashboard allows for the visualization of key metrics such as employee distribution by gender, upcoming promotions, years of service, job levels, job satisfaction, and future retrenchments. The goal is to provide decision-makers with a comprehensive and interactive analysis of HR data to facilitate informed decision-making.

**Dashboard Features:**

- ✓ **Interactivity:**
  - Data filtering by department, job level, and job satisfaction.
  - Enhanced navigation through an interactive menu. To navigate, simply click "Control" on the keyboard while using the mouse to select options.
- ✓ **Key Visualizations:**
  - Bar charts, pie charts, and histograms for quick and clear data understanding.
- ✓ **Detailed Lists:**
  - List of employees eligible for promotion or retrenchment.

**Innovations Added :**

- ✓ We introduced an intuitive navigation feature by combining keyboard ("Control" key) and mouse usage for a smoother user experience.
- ✓ Visualizations were optimized for better readability and more dynamic interaction.

**Tasks Accomplished:**

- ✓ All initial requirements were successfully completed.
- ✓ Additional improvements were made to enhance the user experience and the quality of the analysis.

**Files Available:**

- ✓ **PDF Version:** The report is available in PDF format in the same folder.
- ✓ **Power BI Version:** The Power BI file (.pbix) is also available for deeper data exploration.
